

3D POKÉ QUIZ - TRAINER'S MANUAL V2.5 (2025)

Welcome, Trainer!

This manual outlines the features and mechanics of the 3D Poké Quiz universe. From Algorithm Gyms to System Design battles, this guide will help you reach the top of the leaderboard.

Pro Tip: Ensure hardware acceleration is enabled in your browser for the smoothest 3D experience.

Navigation & Controls

Desktop Controls

- **Scroll Wheel:** Rotate the Poké Ball to reveal navigation links.
- **Click Center Button:** Opens the Hub (Quizzes, Profile, etc.).
- **Fast Sensitivity:** Scroll sensitivity is tuned for high-speed access to your content.

Mobile Features 2025 UPDATE

- **Tap to Open:** Simply tap *anywhere* on the Poké Ball to open or close it. Swiping to open is disabled for better stability.
- **Gyroscope Parallax:** Tilt your phone to look "around" the Poké Ball. The background starfield and model respond in real-time to your physical movements.

Authentication & Access

We use a serverless Cloud architecture to keep your progress safe.

- **Google One-Tap:** Join the league instantly using your Google account.
- **Email/Password:** Traditional signup is always available for independent accounts.

Security Guard: Quizzes are restricted areas! You must be **logged in** to Enter the Gyms. Signed-out users will be automatically redirected to the Trainer Access portal.

The Quizzes (Gyms)

1. **Enter the Hub:** Navigate to "Quizzes" from the main 3D scene.
2. **Pick Your Battle:**
 -  **DSA Gym:** High-stakes Algorithm challenges.
 -  **Core Gym:** Deep dives into OS and Systems.
 -  **Web Gym:** Modern Frontend/UI expertise.
 -  **Sys Gym:** Backend and Database logic.
3. **Score High:** You have 15 seconds per question. Correct answers instantly update your **Mastery Stats** on your profile.

Architecture & Performance

- **Three.js Core:** Real-time 3D rendering with advanced shadows and Cyan rim lighting.
- **Firebase Cloud:** Instant synchronization of scores across mobile and desktop.
- **Adaptive UI:** Designed for 144Hz displays and high-resolution mobile screens.
